Dang sorry I didn't get this back to you sooner. Got a little wrapped up in things but these drawings are approved.

**Subject:** RE: SEPA

I attached an exhibit PDF of the locations of the compactors. At this stage of the project all we need is approval of the locations to show the city of Dupont.

If you could send me the drawings we can definitely look them over and give insight as to what we would need for room to maneuver and so on. I am assuming you have already spoken with a compactor contractor? If not, I have a contact with Solid Waste Systems that would be a good help to you and understands the hauling side.

Were looking to gain approval for the site's trash compactor locations. We have 8 over 4 buildings.

Sounds good, are you looking to do multiple dump sites or 1 site with a compactor?

Hello Ryan,

The name of the site is Founder's ridge, it's a 100-acre light industrial project. The site sits on the east side of Old Fort Lake and The Home Course in DuPont.

Hello Max, my name is Ryan and I am with Pierce County Refuse and I understand you were reaching out regarding a SEPA for a site you are working on? I guess my question to you would be, where is the location you are working and we can go from there?
