It is the responsibility of the permit holder to notify the Building Department 24 hours before inspection requested and ensure that the required inspections are made (see the back of this form for required inspections). This permit will expire if work authorized by this permit is not commenced within 180 days of the date of this permit, or, if the work is suspended at any time for a period of 180 days. This permit may be revoked if the work is not in conformance with the laws, rules and regulations of the City of DuPont. The duty to ensure conformance rests with the builder, developer and permit applicant, not the city. The approval of construction plans and satisfactory inspections do not guarantee that all provisions of all applicable codes have been met. All plans submitted to the city become public record and are available for public inspection and copying. All contractors performing work authorized by this permit must be registered as required by state law.

SPECIAL CONDITIONS: Special inspector for continuous inspection  
To be approved prior to start of project.

I have read the above and agree to abide by the laws of the State of Washington and the City of DuPont. I have read the list of required inspections on the back of this page and will call for all stages of construction.

Craig Overby
