

# Street Sweeping Program

Program Overview

# Sweeping removes debris from roadways and protects storm drains

Here are a few tips on what you can do to help keep our community's streets and storm systems clean and clear:

- Collect and properly dispose of all trash and debris
- Move vehicles off the street, especially when the sweeper is scheduled to be in your area
- Avoid placing trash cans or other obstructions (such as basketball hoops) in the street
- Do not pile leaves in the street; this may cause localized flooding and the sweeper cannot effectively collect piled leaves
- Help keep storm drains clear near your home

***Remember – Only Rain Down the Drain!***

Fall/Winter – Sweeping activities are primarily focused on clearing of leaves & debris to keep curbs & storm basins clear. Tentative schedules will be developed and posted, as weather/conditions may vary.
